Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 14 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent No. 6,808,666 to Fukumori et al.

Fukumori et al. discloses a container comprising a pair of side walls, a reclosable sealing device including first and second locking members (102, 104), each formed with a web (101, 103) extending along the side walls adjacent an open end of the container. Fukumori et al. further discloses a printed visual color indicator (105) automatically and directly applied across an outer surface of at least one of the webs (i.e., the exposed surface of the inner layer of the webs (101, 103). The printed visual color indicator is confined along the first and second locking members of the reclosable sealing device.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-13 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukumori et al. and U.S. Patent No. 5,033,868 to Peppiatt.

Fukumori et al. discloses the claimed invention, especially the printed color visual indicia means (105) automatically and directly applied across an outer surface of at least one of the webs (101, 103) (i.e., the exposed surface of the inner layer of the webs (101, 103)) in the vicinity, or along the length, of the first and second locking members (102, 104). However, Fukumori et al. does not disclose the printed color visual indicia means being coated with a clear lamination layer. Peppiatt teaches that it is known in the art of reclosable containers to laminate and outer transparent layer to an inner layer having printing on its outer surface (see column 2, lines 35-38). It would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide the printed color visual indicia means of Fukumori et al. with the clear lamination layer of Peppiatt, in order to protect the printing.

Response to Arguments

5. Applicant's arguments with respect to claims 1-18 are have been considered but are moot in view of the new grounds of rejection.

Conclusion

6. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing

out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 714.02 and MPEP 2163.06. The "disclosure" includes the claims, the specification and the drawings.
